Notes: PPP = purchasing power parity; e = estimate; f = forecast.

1. Canada, France, Germany, Italy, Japan, the UK, and the United States.

2. In local currency, aggregated using 2005 GDP Weights.

3. Simple average of Dubai, Brent and West Texas Intermediate.

4. Unit value index of manufactured exports from major economies, expressed in USD.

5. Aggregate growth rates calculated using constant 2005 dollars GDP weights.

6. Calculated using 2005 PPP weights.

7. In keeping with national practice, data for India, Pakistan and Bangladesh are reported on a fiscal year basis in Table 1.1. Aggregates that depend on these countries, however, are calculated using data compiled on a calendar year basis.

8. Real GDP at market prices. GDP growth rates calculated using real GDP at factor cost, which are customarily reported in India, can vary significantly from these growth rates and have historically tended to be higher than market price GDP growth rates. Growth rates stated on this basis, starting with FY2009-10 are 8.0, 8.5, 8.2, 8.5, and 8.6 percent – see Table SAR.2 in the regional annex.
